

RECHARGEABLE COLUMN FAN

TFRDC-50RC

ULTIMATE FLEXIBILITY DC MOTOR 24 SPEEDS RECHARGEABLE

Introducing NSA^{UK} rechargeable column fan for the perfect way to keep cool. Versatile and stunning in both features and elegant slimline design, this rechargeable column fan is ideal for any location; home or office. It combines stylish good looks with exceptional cooling performance, quiet in operation and is packed with useful features including being able to turn off the LCD display for nighttime use. You can even add your own favourite essential oils to a discreet aroma compartment.

Boasting an energy efficient DC motor, the rechargeable column fan provides the latest in cooling technology. It runs almost silently and consumes up to 70% less energy compared with a standard AC motor fan, helping to reduce energy bills and the impact on the environment.

Its standout feature is its optional rechargeability. This remarkable fan has a rechargeable battery and can simply be unplugged and switched to 'cord-free' operation and moved from room to room – wherever it is required. Anywhere, anytime, even outside* - enjoy up to 8 hours cordless use (on low setting). Simple, easy & incredibly useful – efficient cooling wherever & whenever you need it.

This fan comes with the very latest finger-touch swirl-dial controls, so it's super easy to use. With 24 speeds in normal operation, 3 mode settings, oscillation and ½hr to 15hr timer you can find the perfect combination for keeping yourself cool, and there's a carry handle for effortless manoeuvrability.
